Signs

Permit Center
345 N. El Dorado Street
Stockton, CA 95202

The location, size, height, numbers or other restrictions pertaining to signs in the City are determined by the zone in which the sign is to be located. Following is a summary of sign regulations by zone. These regulations pertain only to identification signs (sometimes referred to as on-site advertising signs).

Billboards (sometimes referred to as off-site advertising signs) are not covered in this brochure. Please contact City Planning or Building regarding billboard regulations.

General Regulations for All Zones

1. Signs shall not be flashing or moving except time-temperature displays.
2. Illuminated signs shall not reflect on residentially zoned properties.
3. Freestanding directional or similar type signs five feet or less in height, may be permitted without regard to number where deemed appropriate by the Community Development Director.

The complete sign regulations are found under the appropriate zone in a portion of the Stockton Municipal Code commonly referred to as the "Zoning Code". This code may be reviewed at the Planning Office in the Permit Center or purchased from the City Clerk.
